

Seminar List: Neuroscience-Related Seminars

FALL 2017

NEUROSC 299s

N/A

MCB 290s

MCELLBI 290 – Graduate Seminar: GLIAL-NEURAL INTERACTION

E01 SEM, 1 Units

Class #: 17659

Instructor(s): Marla B. Feller

Tu: 4:00 pm - 4:59 pm

Life Sciences Addition 347

Description: In this class, we will discuss the recent literature on neuronal-glia interactions - how do neurons signal to glia and visa versa

PSYCH 290s

PSYCH 290B : Seminars: Biological

002 SEM, 2 Units

2017 Fall-1

Class #: 46856

Instructor(s): Matthew P. Walker

W: 3:00 pm - 4:59 pm

PSYCH 290J: Seminars: Social

"Science of Emotion"

001 SEM, 2 Units

Class #: 20055

Instructor(s): Iris Mauss

Tu: 1:00 am - 2:59 am

PSYCH 231: Graduate Course: Clinical Neuroscience

001 SEM, 2 Units

Class #: 22463

Instructor(s): Robert Thomas Knight

W: 10:00 am - 11:59 am

Barker 210

Description: This course examines how neuropsychology and neuropathology inform our understanding of human brain function. The class will utilize videos of classic neuropsychological disorders, neuropathological specimens of classic neurological disorders including stroke, brain tumor and neurodegenerative disorders as well as selected articles from the clinical and cognitive neuroscience literature.

At the end of the semester, you will be asked to write a brief paper (max 3-4 pages) on one clinical syndrome reviewed during the semester that includes a description of the syndrome, a review of the literature on the syndrome and a synthesis of the relevant cognitive neuroscience literature that may help to explain/understand the observed behavioral deficits.

EECS 290s

ELENG 290T : Advanced Topics in Signal Processing

001 LEC, 3 Units

Class #: 42795

Instructor(s): Chunlei Liu

Tu, Th: 11:00 am - 12:29 pm

Cory 299

LING 290s

No Neuro-related courses.

VIS SCI 298s

Pending: Course taught by Stan Klein
